

(a) Warehouse measurement graph: 55,039 nodes, 645,000 edges

(b) Context co-occurrence degradation graph: 39 nodes, 657 edges

(c) External-reference evidence graph: 240 nodes, 278 edges

Node types

- Measurement
- Session
- Warehouse context value
- Co-occurrence context value
- Source dataset
- Metric
- Reference context
- Comparison evidence

Edge meanings

- Association or membership link
- Warehouse context link
- Measurement transition
- Evidence link
- Reference-context link

- Source-metric support link
- colored support paths
